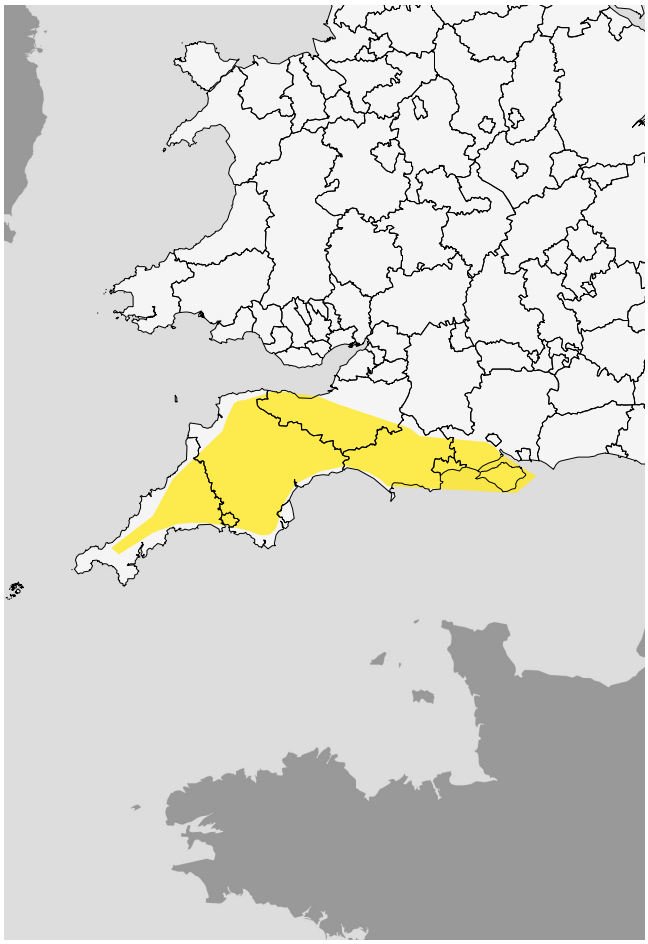
Yellow warning
Snow & Ice

Between
18:00 Tue 13 Dec 2022 and
10:00 Wed 14 Dec 2022



Some snow and ice causing travel disruption in places.

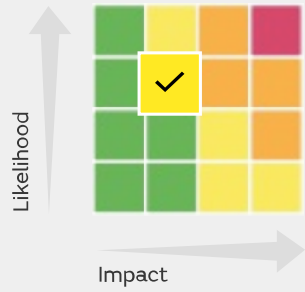
What to expect

- Some roads and railways likely to be affected, leading to longer journey times by car, as well as bus and train services
- Snow and sleet falling on frozen surfaces may lead to icy conditions, increasing the risk of accidents and injuries
- The combination of wind and snow may cause some drifting and very poor visibilities, especially over hills and moors

Further details

Intermittent, mostly light, snow across southwest England on Tuesday afternoon may become a little heavier and more widespread into Tuesday night, before clearing southwards on Wednesday. Near some coasts sleet is more likely, especially at first, but this brings an ice risk. Strong winds may cause drifting and poor visibility, especially over Dartmoor and Bodmin Moor where the snow is likely to be heavier. Here, 5 to 10 cm snowfall may accumulate above 200 metres.

Towards the north and east of the warning area small amounts of snow, mostly no more than 1 cm, seem likely.



✓ Medium likelihood of low impacts
